

Symptom-Free Pee: LET IT BE

A national initiative to stop inappropriate antibiotic use for asymptomatic bacteriuria in elderly patients.

STOP

STOP treating asymptomatic bacteriuria; it is not an infection
STOP testing foul-smelling, dark, or cloudy urine

WAIT

WAIT and rehydrate patients who develop changes in mental status, behaviour, or function without typical urinary tract infection symptoms

GO

GO to urinalysis and urine culture if typical signs and symptoms of urinary tract infection are present
