

William Osler Health System (Osler), located 40 minutes from downtown Toronto and 20 minutes from Pearson International Airport, is a multi-site hospital system serving 1.3 million people in one of the fastest growing and most culturally diverse regions in Ontario. Awarded Canada's Best Diversity Employer award for the 9th straight year; the first hospital to reach this milestone in Canada, and a new member of the Schwartz Centre for Compassionate Healthcare, we are committed to bringing patient-centred health care to the forefront, using innovation, compassion, and a safety-first mindset in our delivery of care. Osler invites you to answer the call to make a difference. Learn more about [who we are and how we are going beyond for healthier communities](#).

The Infectious Diseases - Microbiology Program at William Osler Health System consists of four ID physicians and one Medical Microbiologist across 2 campuses (Brampton Civic and Etobicoke General Hospitals). The program is supported by the Microbiology Laboratory, an Infection Prevention & Control Team, a Clinical Epidemiologist, and an ASP program team. Osler's ID-Micro Program anticipates expansion with the ongoing redevelopment of EGH and the expansion of the Peel Memorial Campus and is looking to recruit a fifth Infectious Diseases Physician who will also provide Medical Microbiology services.

Candidates must be licensed to practice Medicine in Ontario (CPSO) and be a Fellow of the Royal College of Physicians and Surgeons of Canada with an FRCP(C) Certificate of Competency in Infectious Diseases and Medical Microbiology in addition to being eligible for credentialing at the William Osler Health System.

The successful physician should be highly motivated and flexible to transition to into new roles as program and corporate needs evolve. Through a combination of clinical and laboratory initiatives they will work collaboratively with the current Microbiology and ID consultants, lab personnel and pharmacists. For candidates more academically inclined, Osler also provides ample clinical research opportunities. Teaching opportunities also exist within Osler's training partnership with McMaster University and the future Ryerson-Osler Medical School.

The consultant should demonstrate excellent oral and written communication skills in English and possess the essential qualities of a specialist consultant including approachability, availability and collegiality. Additional languages are considered an asset as we serve a highly diverse population. Opportunities to enrich Osler's ID program with the creation of, or participation in, specialized clinics in Travel/Tropical Medicine, HIV, Tuberculosis, and an Outpatient Antibiotic Clinic may become available. Additional training in HIV, Tropical Medicine, TB or other specialized areas within Infectious Diseases would be considered beneficial.
