l'Île-de-Montréal

Québec 

FULL TIME POSITION

Ospedale Santa Cabrini Hospital is actively recruiting for a full time infectious diseases specialist who can speak both French and English.

Santa Cabrini Hospital is a community hospital with 285 beds and is part of *the CIUSSS l'Est-de-l'Île-de-Montréal* (integrated health care system of university, non-university hospitals and chronic care facilities in the end of Montreal). Our mission is to offer general and specialized medical care to a multicultural community, serving an area with the population of approximately 750 000 people. We are a level two trauma center with medical specialities such as Hematology-Oncology, Pulmonary Medicine, Endocrinology, Cardiology and Gastroenterology. We also have a busy orthopedic surgical service and other surgical services such as Gynecology, Urology, Plastic Surgery and of course General Surgery.

The follow up of our patients is done at the External Clinic and Medicine Day Unit (UMJ), where the ambulatory home IV antibiotic therapy program is organized

The infectious diseases service treats a multitude of clinical cases from patients with Hepatis B, Hepatis C, HIV, and Tuberculosis to fasciitis, endocarditis and postop infectious complications. We are also actively involved with the antibiotic stewardship and infection control committees for the CIUSSS.

Our service is composed of dynamic individuals, some with over 20 years of clinical experience. The new candidate should be a team player who enjoys the challenge of working in a community hospital. Dual certification as a medical microbiologist is advantageous, but not obligatory.

If you are interested, please send your CV and letter of intention with two reference letters to silvana.trifiro.med@ssss.gouv.qc.ca and feel free to contact us at the number below.

Silvana Trifiro MD, FRCP(C)
Chief of Infectious Diseases/Medical Microbiology
